-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 11 September 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 18-22,24 and 28-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Moss. Moss in figs. 37,38 shows abutment shoulders 252 a,b that includes an arcuate portion adjacent 194 in fig. 38, rail mounts 20a and 20b and rails 18. Figs. 9,14,17,24 and 25 showing rail mounts 20 having varying cross-sections, as set forth in claims 19,20,30 and 31.

Claims 18-20,22,28 and 32-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Lu.

Claims 18,22,28 and 34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kinser.

Claims 18,22,28 and 32-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pflugradt.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pflugradt, Kinser or Lu. To make their hinge components by the conventional extrusion process for its known advantage would have been an obvious mechanical expediency.

Claims 21,30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lu in view of either Swiderski et al or Purkapile. Lu shows the claimed hinge and rail assembly with the exception of the reinforcement segment. Swiderski and Purkapile show stems, 32; 50,150, respectively, having reinforcement segments. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the stem portions of Lu to comprise reinforcement segments, as taught by either Swiderski or Purkapile, to strengthen same.

Claims 19,20,30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moss in view of either Yuen or Kuemmerlin. Moss shows the claimed hinge and rail assembly with the exception of the mount being inserted within the rails. Yuen and Kuemmerlin show mounts inserted within their rails. It would have been obvious to one of ordinary skill in the art at the time the invention

was made to modify the Mount portions of Moss to enable insertion into its rails as shown in fig. 17, as taught by either Yuen or Kuemmerlin, for attaching his mounts interiorly of his rails.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
